Foreword

The COVID-19 pandemic has presented an opportunity to rethink higher education. For any recovery to be meaningful and sustainable, there must be reform. Thus, BUISTEMS had to pivot to online learning to try and maintain learning and business continuity. The pandemic accelerated digital adoption across the global higher education sector. It was an opportunity to show that the university can adapt quickly. It has been a challenge to the innate conservatism and sluggishness imputed to the education sector and we discovered that we have more room for manoeuvre and change.

In the past, universities were the curators of knowledge in society, but in a post-pandemic world, they will not have the same natural hegemony that is central to the knowledge economy. Consumers today have many opportunities to access and share knowledge and universities are at risk of being marginalized, especially if they have isolated ways of working rather than an outward-looking culture.

University leaders need to reimagine and adopt game-changing strategies in curriculum design, assessment, and delivery to sustain and grow ahead of the market. Additionally, the willingness with which students have accepted online and blended learning, and universities must play a new role in redefining students' relationship with technology. The universities need to be more focused on their purpose and who they want to serve. Moving away from institutional positions and focusing on their public role will build a more sustainable position. This shift will be driven by the investments the universities have made in distance education and the increased familiarity of the students, staff and institutions with e-learning.

Many of the technologies that helped us survive and maintain continuity in the classroom are permanently embedded in our educational methods and play a critical role in refining practices that accompany an ongoing shift towards more student-centred learning.

we congratulate those who have achieved top positions in their batches becoming the torch bearers of success and determination, proving that with effort nothing is impossible.

BUITEMS Monument

BUITEMS Monument at Takatu Campus symbolizes society's pride, educational advancements and academic excellence. The Monument is represented in unison by a pen, a feather and a paint brush. All the three elements, made of bronze and steel, are combined and encircled by the logo of the University depicting harmony and peace. Each element in itself carries a connotation highlighting the vision and mission of BUITEMS.

The pen and the feather portray an analogy of literary work that encapsulates the soul and spirit of an educational institution whereas the paint brush signifies creativity being the catalytic element of all sciences. The pen, the feather and the paint brush corresponds to positive and constructive sustaining efforts that any society aims for.

Encircling above objet d'art, is a brass emblem of indigenous campus life which depicts a bond that transcends time and space and the social/cultural diversity among our students which promote the ideals such as friendship, loyalty, academic achievement and intellectual development, service to the community and the alma mater, honor and integrity, leadership and personal responsibility.

The existence of BUITEMS Monument itself embodies the sense of morality for the University and will endure for the times to come.
